How to Write Multilingual Text with Different Scripts in LaTeX using Polyglossia

Lim Lian Tze

This is a mainly English document which contains other languages. Here we use `polyglossia` and `fontspec`.

You'll need to use XLaTeX or LuaLaTeX to compile this document. You can configure your Overleaf project to be compiled with XLaTeX by clicking on the Overleaf menu button above the file list panel, and set `Compiler` to XeLaTeX or LuaLaTeX.

1 Greek

Here's some Greek:

Οδιο διστα ιμπεδιτ φιμ ει, αδ φελ αβχορρεανθ ελωκυενθιαμ, εξ εσε εξερσι γυβεργρεν ηας. Ατ μει σολετ σριπτορεμ. Ιυς αλια λαβωρε θε. Σιθ κυωτ νυσκυαμ ιρασυνδια αν, ωμνιυμ ελιγενδι ιν πρι. Παρτεμ φερθερεμ συσιπιαντυρ εξ ιυς, ναμ τωλλιτ ιυφαρεθ αδφερσαριυμ εα, πρω πρωπριαε σαεφολα ιδ. Ατ πρι δολορ νυσκυαμ.

2 How Do I Know What Fonts are Available on Overleaf?

You can check the list here: `https://www.overleaf.com/help/193`

Tip: We have the Noto fonts!!
